**To: The residents of Andrew Street, Ellen Street and William Street**

**UPDATE TO THE ROAD REHABILITATION, WATERMAIN REPLACEMENT,  
SANITARY SEWER REPLACEMENT, CONSTRUCTION OF STORM SEWER AND  
CONSTRUCTION OF SIDEWALK**

---

Dear Resident,

We are pleased to advise you that the work on Andrew Street, Ellen Street and William Street is now substantially complete. As a final step and prior to the placement of the top lift asphalt, the Town is conducting underground investigative work to ensure that new watermain and the storm and sanitary sewers comply with the Town's specifications.

Consequently, you may have noticed that Direct Underground was conducting sanitary sewer repair works in the vicinity of 415 Andrew Street on Thursday/Friday, July 24 and 25<sup>th</sup>. The works have now been completed and we will be in the process of conducting the underground investigative works on the storm sewer and watermain shortly. Furthermore, you may have noticed that there is work going on near the east end of Andrew Street where it intersects with William Street. This work is for the Fairy Lake Walkway System and is independent of the Andrew Street project. However, the contractor on this project requires access for their machinery and materials at the above location.

As a result, the top lift asphalt will be placed subsequent to the successful completion of all underground investigation works and the successful completion of the Fairy Lake Walkway project later this year.

If you have any questions, please contact the undersigned at (905) 953-5300, press 2, ext. 2504 via telephone or at [tungar@newmarket.ca](mailto:tungar@newmarket.ca) by e-mail.

Sincerely,

Tom Ungar, P.Eng.,  
Capital Projects Coordinator
