NOTICE OF PROJECT

PATTERSON STREET WATERMAIN REPLACEMENT

Dear Resident,

The Town of Newmarket is planning to replace the existing watermain, appurtenances and service connections on Patterson Street between Davis Drive and a point approximately 38 metres south of Sunnypoint Drive at a future date. In preparation for this project to proceed to design and construction, the Town is arranging with its consultant (Ainley Group) to undertake engineering investigations, surveys, soils studies and other field information gathering. This fieldwork will be underway shortly and is expected to be completed by the end of 2015, weather permitting.

The surveyors are required to determine ground elevations, property lines and the location of all utility poles, driveways, trees, utility cabinets, etc., located within the Town's right-of way. As houses and driveways need not be shown on the project drawings there will be no need to enter onto your property to take measurements. Town sewer and watermain pipes, as well as other underground utilities will also need to be included in the survey and the location of these services will be marked out by the applicable agencies with paint marks or flagging tape.

A Public Information Centre (PIC) will be held in 2016 to provide residents the opportunity to review the proposed design, discuss the project with Town staff and provide input. You will be notified in writing of the date and location of the PIC.

Should you have any questions regarding this project please contact the undersigned at 905-953-5300, enter 2, followed by 2504 via telephone, or at tungar@newmarket.ca via e-mail.

Yours truly,

Tom Ungar, P.Eng.
